

Go Outside

Flash Light Tag

What you need:

1 Flash Light

How To Play

You can play this game anywhere outside; it just needs to be a dark and safe area. Choose a base and have the person who is "IT" stand and count with their eyes closed while the others go and hide. After 60 seconds of counting, "IT" will go search for the ones hiding without covering or turning off their flashlight. People hiding can move around and try to make it to base without being seen. If they are spotted and "IT" calls their name, they are considered tagged and have to go sit down by the base. You are safe if you make it to the base without being spotted. The last person to be tagged and brought to base is "IT" next.
